

How do I install the AUS Pharos printing client on my laptop?

The following is the procedure to install the Pharos client on your laptop:

- **IMPORTANT:** If you already have the Pharos Client installed on your laptop prior to January 2006, please make sure to Uninstall the old version of the Pharos client.
- Go to <http://intranet.aus.edu/pharos> and browse Printers by Building for the installation package for the Library. As shown below:

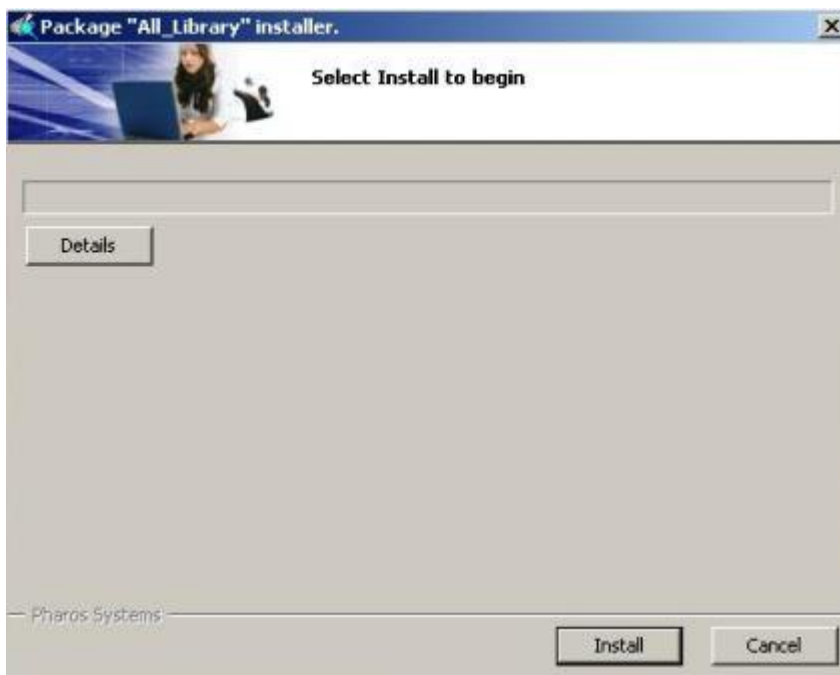

- Click on the **.exe** file and select **Run** as shown below

- Click **Run** on the following Security Warning window. As shown below

- Click Install to begin the installation.

- Click Finish to complete the installation.
- Change the default paper size to A4. (Right click the appropriate printer icon under Control Panel-->Printers and select Printing Preferences, Paper / Quality, Document Size)
- DO NOT CHANGE any of the printer names after they are installed on your laptop. If you change printer names, the print jobs will not be sent.

If you have any problems getting the Pharos client to work properly, visit the Information Commons Help Desk for assistance.
